EZ Pools® are the Better Portable Pool Choice

We offer more accessories, options, features and benefits than all the other portable pools combined

The Better Portable Pool

EZ Pools® are unlike traditional swimming pools, as they are considerably easier to assemble and can typically be up and ready for water in a matter of a couple of hours, compared to days, weeks or months with traditional swimming pools. This "portability" affords an EZ Pool so much more flexibility in creating opportunities where none existed before.

From Carton to Completion the simplistic yet incredibly durable design of an EZ Portable Pool have allowed customers to be able to achieve many more uses and applications that a traditional in-ground or metal-sided above ground pool just can not offer. If you have not already done so, take a few minutes to go through all the incredible examples of what customers have done with their EZ Pool.

EZ Lap Pools Offers More Features and Benefits

Lap swimming is very healthy and getting access to your own lap swimming pool just got EZ.

EZ Pools offer More Benefits

There are many ways to enjoy a full-size swimming pool in the privacy and security of your own backyard. But the number one reason is the ability to enjoy a cool and relaxing swim, without crowds, without noise and without swimming in some one else's bath water (Yuck!)

Customers who buy an EZ Pool discover another benefit: they find themselves doing more exercises, burning more calories, and actually looking forward to a daily dose (or two) of water-based exercise. And as such, they find themselves exhausted making it easier to sleep.

But just as easy as it was to exercise, it is equally as easy to relax. After your exercise routine, just grab yourself a floaty and let your body relax in the quiet confines of your own home. EZ Pool owners report to us that they play the music they like and between the exercise and the personal music choice - their stress just melts away. And since every EZ Pool is made-to-order to your exact needs, and that they are not only easy but affordable, you are able to relax in complete contentment knowing you did not waste a lot of money, time and effort associated with an old-fashion traditional swimming pool.

Sometimes it is very hard for a person or a family to find access to a swimming pool. And often times when they do find one - it's too crowded or the water is just too gross. What's a family to do? Some families decide to join a gym or local fitness facility that has a pool. But a family membership can be expensive and again, you are sharing a pool with complete strangers. Do you know who your kids are swimming with?

Your EZ Pool does not exist until you are ready to buy it. Allowing families to look at their backyard to find unused space that can be turned into a recreational playground and fitness spot. Just give us the available space, and we can make your very own EZ Pool playground. Take a look at the links below for ideas.

EZ Pools are Made to Last for Years to Come

Don't waste money on a cheap grocery-store pool - invest in an EZ Pool for years of enjoyment.

EZ Pools by Name and by Product

Every EZ Pool is a Portable Pool - but not every Portable Pool is an EZ Pool. This is a statement of fact. We sell EZ Pools exclusively customer-direct, we therefore have a list of a customer's purchase going back to the early days of 2006. We have all our records and know our family members by name.

We are not like those giant web-dominate retailers that sell everything from cars to bars of soap. We sell EZ Pools, accessories related to EZ Pools and that's it.

For our customers, it is not just a purchase - it's an investment. Families invite our products into their home, to be an important part of the family and a source of family togetherness and playing together in the privacy and security of their own backyard.

EZ Pools are Made Right and made right in Your Backyard

Literally. These days, almost 100% of portable pools found on the internet are made in Asia (China or Korea). EZ Pools are the only portable pool made right here on American soil. So yeah - right in your backyard. We use American parts and materials as well. It is true that you can save a lot of money buying parts from other parts of the world, but then you can be sure of the quality of the component. Not all materials are the same - we know because we have tested them all. If you have read our history, then you know we use to work with a Korean company in the early days of the KD Pool. But when KD was purchased, and the new company moved them to China - we said no way. At one point, there was about ten providers of portable pools in the market, all made in Asia. Now they have all gone out of business - **And We are Still Here.**

An EZ Pool is also made right in you backyard - because our pools are so easy to assemble they do not require a professional team of installers. **From Carton to Completion to One Hour** that is usually all it takes. Of course the larger pools can take longer - but year after year customers re-affirm that statement. On occasion, a customer will let us know they did it in less than one hour.

Yes our pools are easy and affordable - but not cheap. If you want a cheap pool, go to the grocery store. Certain times of the year, everybody sells pools. So if cheap is your only criteria - then there are hundreds of places pretty much selling the same Chinese-made cheap pool.

EZ Pools are Made-to-Order. We do not stock pools for one very important reason - not everybody wants the same pool, same size or even the same color. Only EZ Pools offers this unique ability to make an EZ Pools that is right for you. Learn more about **Our Quality Here >>>**
