

Wide-Mouth Skimmer Mount:

The wide mouth skimmer may curve out with the pool wall. If this happens, it prevents the skimming action from working properly. To avoid this, you can secure it to the vertical frame of the pool using hard pvc pipe. This will keep it perpendicular to the water, allowing it to work better.

DO NOT INSTALL THE WIDE-MOUTH SKIMMER WITH WATER IN THE POOL.

BE SURE TO INSTALL BOTH THE SKIMMER AND THE RETURN LINE BEFORE FILLING.
